

Who We Are

FEDSIM is the leading full service, assisted acquisition organization that works with federal agencies to assist them through the federal acquisition process. We are an organization that has been evolving since our inception and we continue to expand our services and adapt to the ever changing acquisition marketplace. FEDSIM manages projects ranging from professional services, system and network operations and maintenance, development of new applications, purchases of hardware and software, and many other IT goods and services.

HOMELAND

Within the four sectors of FEDSIM, our staff provide technical and acquisition expertise, and creative solutions to ensure that projects are compliant and within a reasonable timeframe.

Mission-Centric

SERVICES

We provide continuous high-touch, mission-centric program management and acquisition expertise across each contract's life cycle.

SOLUTIONS

Our approach is customized to each individual project, while our business practices drive our high quality.

SAVINGS

We handle all the details. As we save our clients both time and money, they can focus on what's important – their mission.

SKILLS

We are not just Acquisition and Project Management experts, we are trusted advisors and client advocates.

Our team provides services from the pre-award phase of the contract until the final closeout report is published. Our expert staff knows the rules and regulations of the acquisition process inside and out and utilize this information to develop creative solutions to ensure compliance and quality.
